The Journey of Opensource

Contributing isn't just about Code

Making a contribution to your favorite open source project doesn't have to involve programming

Whatever your reason for avoiding code, there's still plenty of ways you can get involved.

- Become a tester
- Write documentation
- Become a translator
- Help with bug triaging
- Suggest a feature
- Help with design
- Answer questions
- Blog about your experience
- Give a talk at a user group meeting

JUST DO IT.
